

# Introducing the new Lutron Classico™ binder

Fresh look.  
Better format.  
Easier specification.

Here are the 5 key improvements  
you won't want to miss.

**Fabric categories.** The binder is organized into the following four fabric categories, making it easier to find fabrics.

#### **Sustainable Solar Screens**

Materials incorporating the functional characteristics of traditional solar screens but with the added benefits of environmentally friendly and sustainable properties

#### **Solar Screen I**

Fabrics with weave opacities to cut glare and preserve view, while enhancing aesthetics and comfort in any space

#### **Solar Screen II**

Fabrics with weave opacities to cut glare and preserve view, while enhancing aesthetics and comfort in any space

#### **Blackouts**

Dual-sided and standard opaque fabrics to block sunlight in spaces like bedrooms or home theaters

 **LUTRON**

# Introducing the new Lutron Classico™ binder

**User-friendly swatches.** Fabric swatches are bigger (5" x 10"), easier to use, and oriented in portrait view so they're easier to see.

**Fundamental facts.** You'll find key fabric specification and fenestration data on each card.

**Essential information.** You'll find shade styles, types, options, and technical guide information on an insert card, as well as information about the Lutron custom printed roller program.

**Comparison cards.** Each binder contains a color and openness comparison card so you can demonstrate the difference between light and dark fabrics across four openness factors (1%, 3%, 5%, 10%)

We're excited to offer this refreshed binder to you, and we hope you're just as excited about sharing it with your customers. We appreciate your dedication to Lutron!
